

PREMIUM BRIQUETTERS

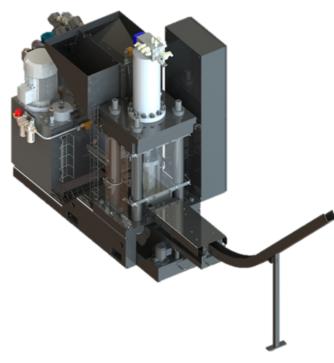

The PREMIUM range of chip presses are designed to handle large volumes of chips from machining and also grinding sludge.

The chip compactors of this range processes ferrous and non-ferrous materials such as aluminium, copper, stainless steel, titanium, etc.

CARACTERISTICS

- Cost-effective solutions
- Direct financial gain on resale in briquettes
- Directly recoverable transformation
- Reuse of cutting fluids and reduction in the amount of effluent to be treated externally
- Reduction in the volume of waste to be transported

BENEFITS

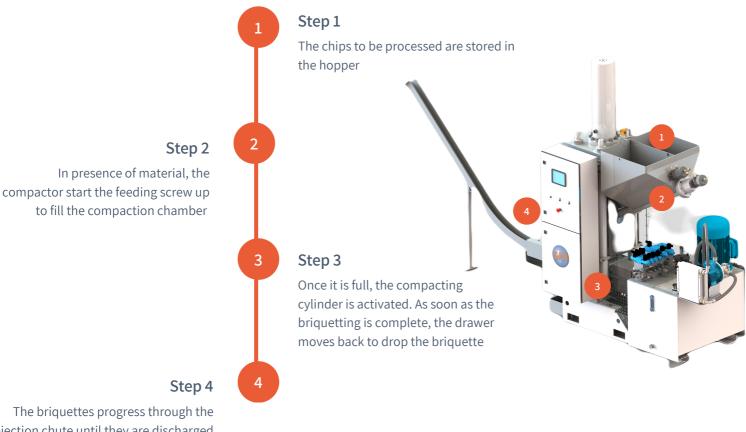

- Space saving on the waste
- Robust and simple construction
- Very high-pressure of briquetting
- Feeding screw with hydraulic drive
- Treated compaction chamber
- Simple maintenance/service
- Recovery of cutting oils
- Rapid return on investment
- Optimization of energy consumption

OPTIONS

- Specific and customized centralized systems
- Heater for outdoor installation
- Airblast cleaning
- Special hoppers
- Chip crusher
- Chip wringer

Operation of the premium briquetter
